

# Assignment 1

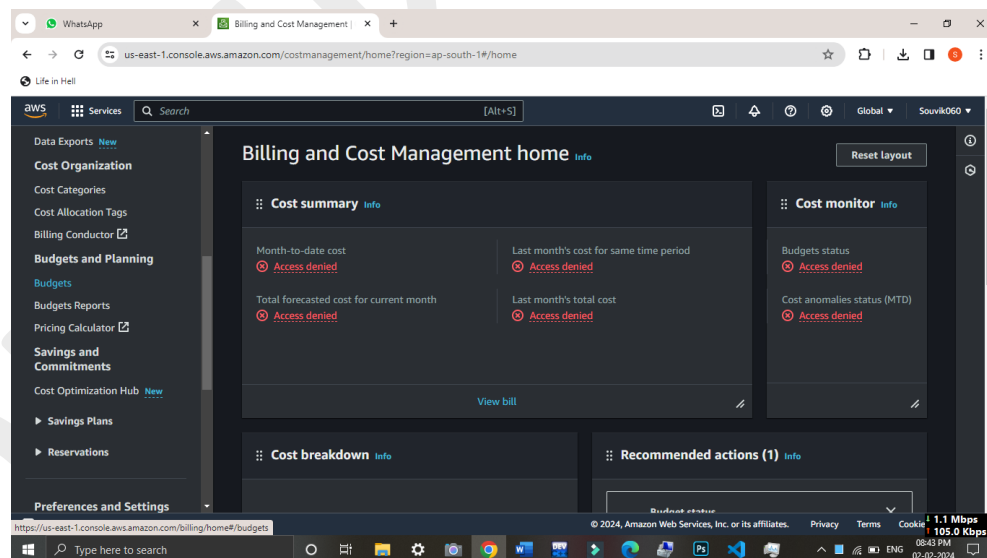

**Statement:** Create an account in AWS and configure a budget.

## Steps:

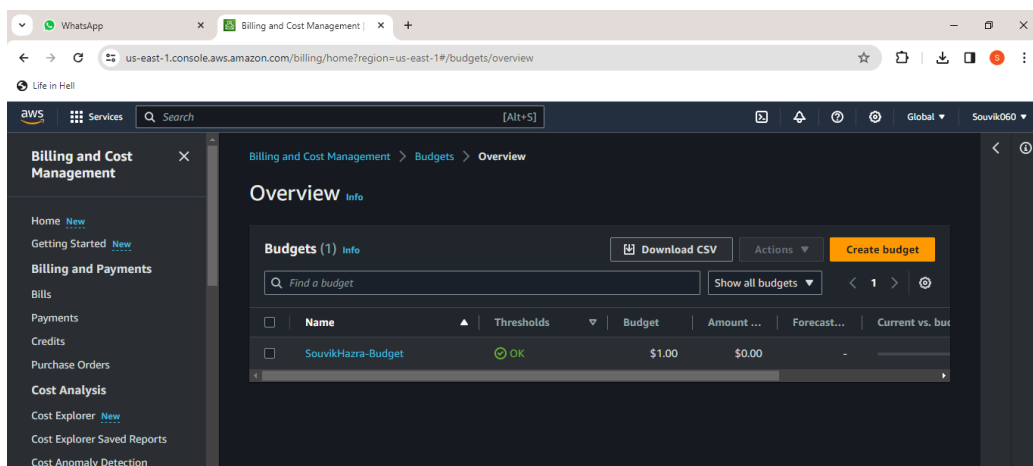

- a) At first we go to 'Account' section and from there we go to 'Billing cost management'.

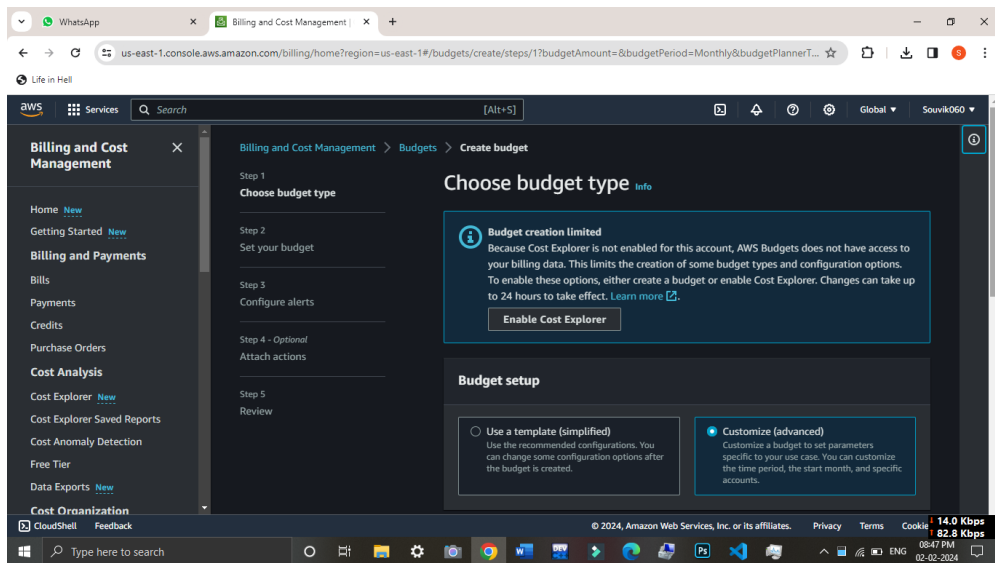

- b) Then we go to 'Budgets Planning and Budgets' option from there. Now click on the 'Budgets' option.

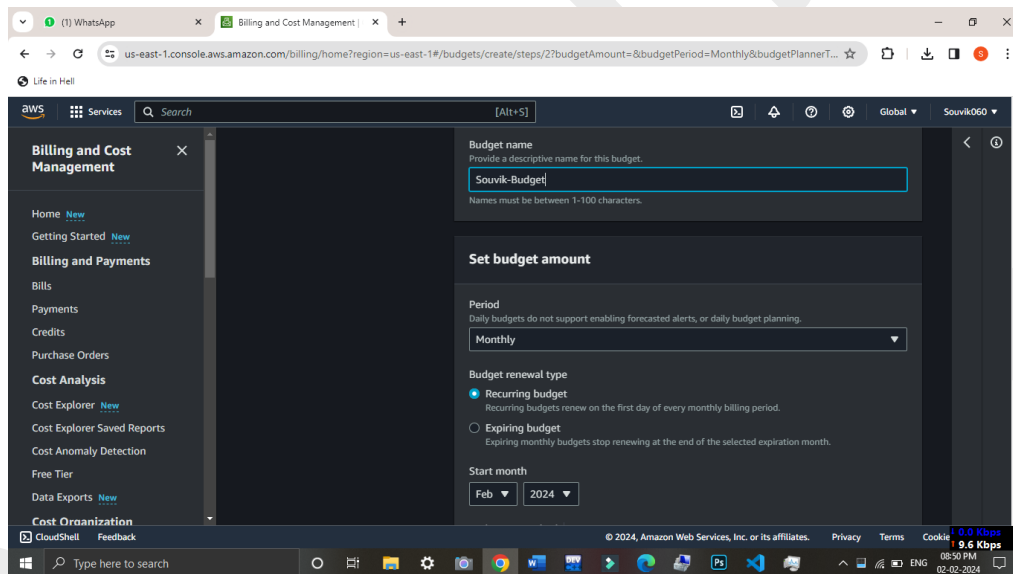

- c) Now go to 'Create a Budget' option. Here we will set alert. After crossing budget, notification will be created in mail.

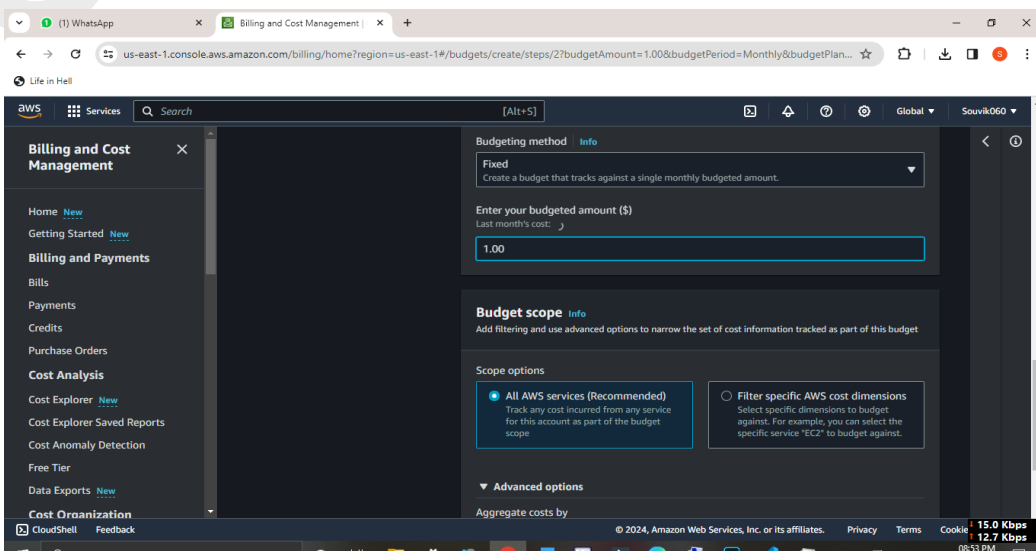

d) Now set up the budget ,select Customize(Advanced) option.

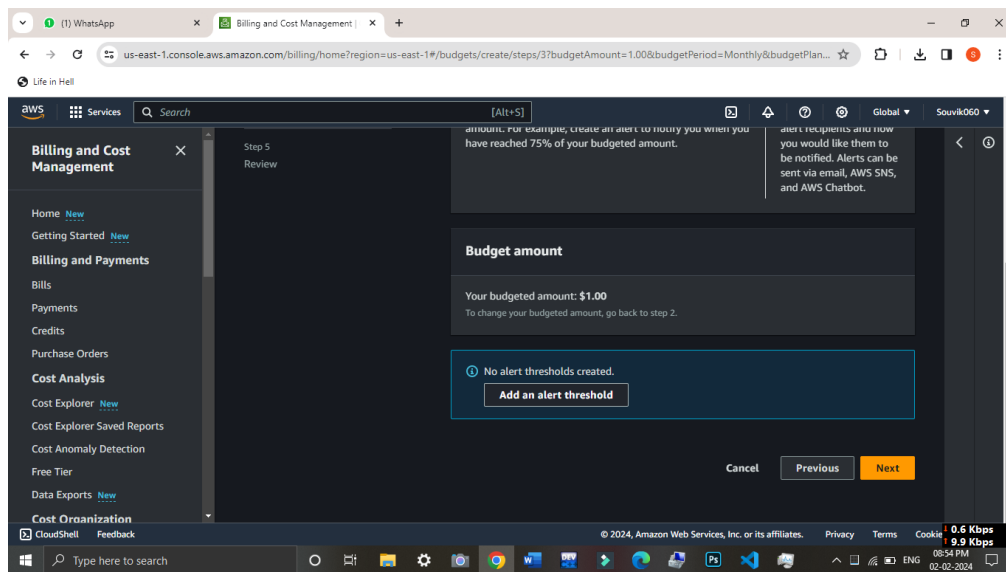

e) Give budget name. Set budget period Monthly and budget renewal type as Recurring Budget. It will start from last and continue up to last day of month.

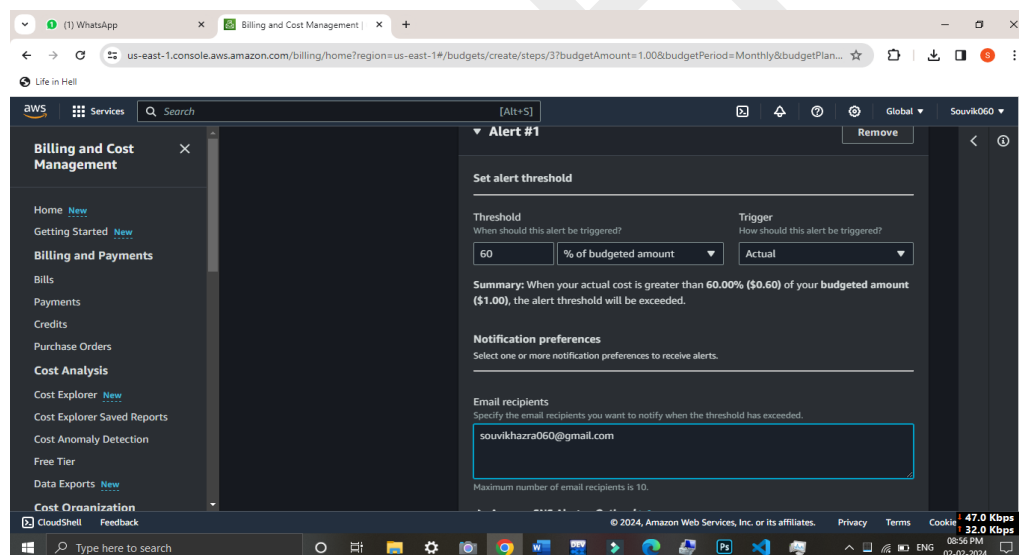

f) After this set budget amount (lets take 1.00\$) and now press Next without changing other option.

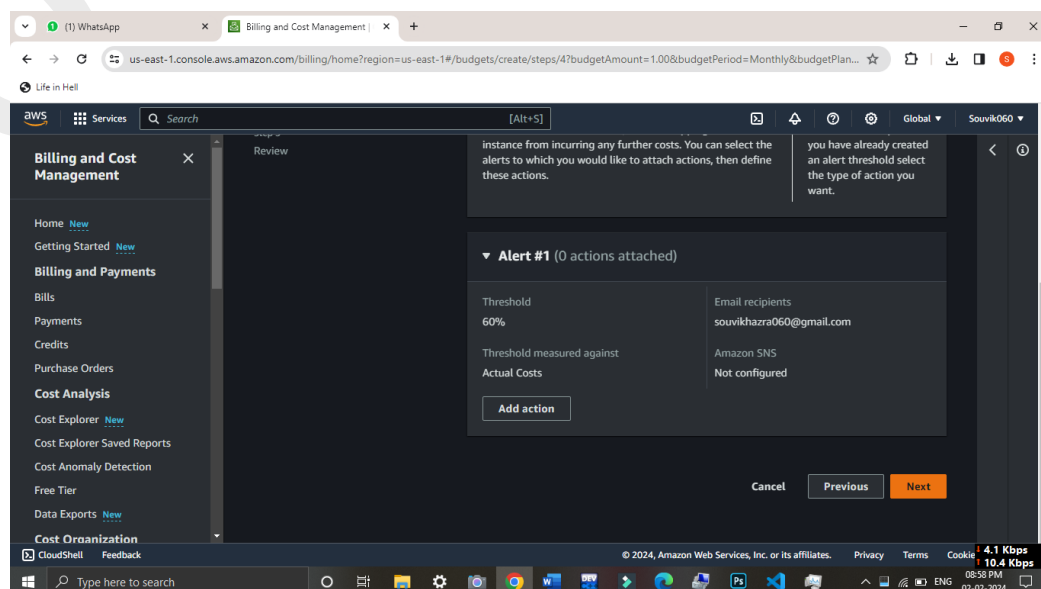

g) After this click on 'Add an alert threshold' and create a alert threshold.

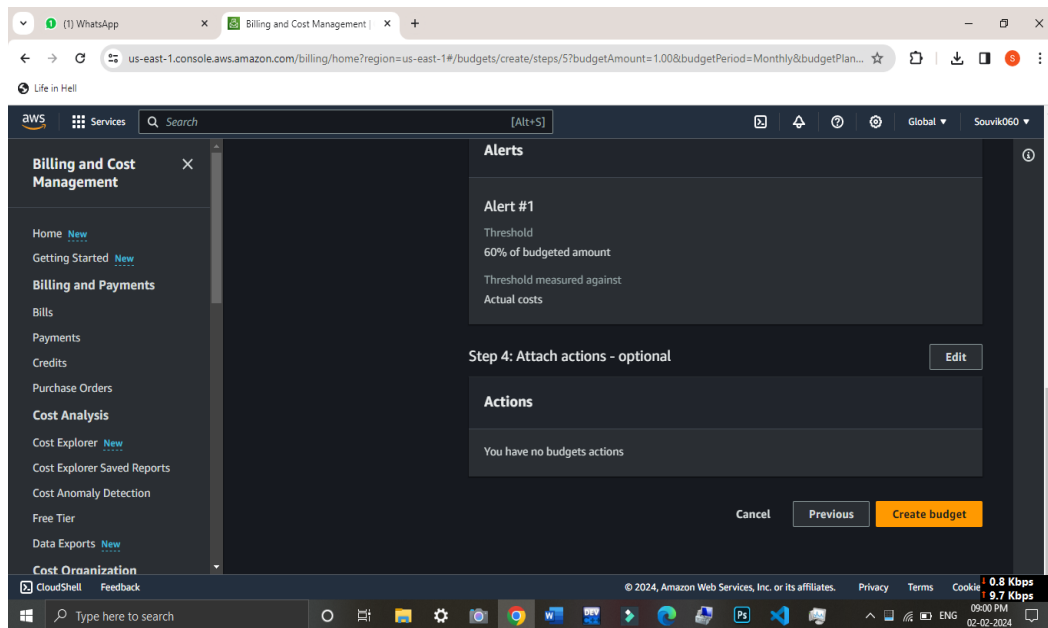

h) Set an alert threshold, we set 60% here. Now give your email address and press 'Next'.

i) After that , created alert threshold will show and we have to click on 'Next'.

- j) Now a final page will occur ,and we can edit if there some mistake. After that click on ‘Create Budget’ to creating the budget.

- h) Our budget is creating successfully , and if we want to delete this we have to click on the budget name then delete.
